

What is claimed is:

- 1 1. A hand wallet, comprising;
2 a flexible base with a means for securing the base to a user's extremity; and
3 a first storage pocket mounted on the outer surface of said base.
- 1 2. The hand wallet as set forth in claim 1 wherein the flexible base is secured
2 to the user's extremity by use of a strap comprised of two elongate straps which are
3 connected when secured.
- 1 3. The hand wallet as set forth in claim 2 wherein the two elongate straps are
2 connected by hook and loop fastener when secured.
- 1 4. The hand wallet as set forth in claim 1 wherein the flexible base is secured
2 to the user's extremity by use of a zipper.
- 1 5. The hand wallet as set forth in claim 1 wherein the first storage pocket
2 further includes a means to expand in a vertical direction away from the base.
- 1 6. The hand wallet as set forth in claim 1 wherein the first storage pocket
2 further includes a closure means to close the first storage pocket.
- 1 7. The hand wallet as set forth in claim 6 wherein the closure means to close
2 the first storage pocket is selected from the group consisting of a zipper and hook and
3 loop fastener.

1 8. The hand wallet as set forth in claim 1, further comprising:
2 a protective flap which covers the first storage pocket; and
3 a fastening means to fasten the protective flap to the base over the first storage
4 pocket.

1 9. The hand wallet as set forth in claim 8 wherein the fastening means is
2 selected from the group consisting of a zipper and hook and loop fastener.

1 10. The hand wallet as set forth in claim 1 wherein the first storage pocket
2 extends around the periphery of the base.

1 11. The hand wallet as set forth in claim 10 wherein the first storage pocket is
2 adapted to accept a drinking bladder and the first storage pocket further includes an
3 opening through which a fluid stored in the drinking bladder can be removed.

1 12. The hand wallet as set forth in claim 10 wherein the first storage pocket is
2 adapted to accept a weight.

1 13. The hand wallet as set forth in claim 1 further comprising:
2 a second storage pocket mounted on the outer surface of said base.

1 14. The hand wallet as set forth in claim 13 wherein the second storage pocket
2 is mounted on the outer surface of said base at a location opposite to the first storage
3 pocket.

1 15. The hand wallet as set forth in claim 13 wherein the second storage pocket
2 further includes an expansion means to expand away from the base.

1 16. The hand wallet as set forth in claim 15 wherein the expansion means is an
2 elastic panel incorporated into the second storage pocket.

1 17. The hand wallet as set forth in claim 13 wherein the second storage
2 pocket further comprises a restraining means for retaining an item within the second
3 storage pocket.

1 18. A hand wallet, comprising;
2 a flexible base with a means for securing the base to a user's hand;
3 a first storage pocket mounted on the outer surface of said base and configured to
4 be located on the back of the user's hand when secured;
5 a protective flap which covers the first storage pocket;
6 a fastening means to fasten the protective flap to the base over the first storage
7 pocket; and
8 a second storage pocket mounted on the outer surface of said base and configured
9 to be located on the palm side of the user's hand when secured.

1 19. The hand wallet as set forth in claim 18 wherein the first storage pocket
2 further includes a means to expand away from the base and the second storage pocket
3 further includes a means to expand away from the base.

1 20. A hand wallet, comprising;
2 a flexible base with a means for securing the base to a user's hand; and
3 a first storage pocket mounted on the outer surface of said base wherein
4 the first storage pocket extends around the periphery of the base;
5 the first storage pocket is adapted to accept a drinking bladder; and
6 the first storage pocket further includes an opening through which
7 a fluid stored in the drinking bladder can be removed.
